Deliverable 3:
List of actors

ODI Tender RDP8-001

Authors: Gemma Galdon Clavell and Carmela Troncoso

Research assistants: Victoria Peuvrelle and Miguel Vallbuena

There are not many actors in the field of anonymisation. For a long time, personal data has been seen as an asset to collect and keep with as many personal identifiers as possible in order to improve personalisation, market analysis, market price of the datasets, etc. It is only with GDPR and the increasing citizen awareness of the risks of an uncontrolled market of personal data and its impact on reputation or life chances that the issue of re-identification has begun to gain momentum as a risk to mitigate. Therefore, the market is still emerging.

Below we list some of the reference actors in this field. We have chosen to include private providers but also university departments. While not all the actors listed provide services to clients, they all are reference spaces in this field. We have **highlighted** the ones we believe are more relevant in terms of providing practical help to organisations seeking to assess re-identification risk and/or to anonymise data.

Actor	Description	Services	Contact details
Universities			
COSIC's Privacy Technologies Team	Subgroup within COSIC (a research group at KU Leuven) with an interest in privacy enhancing technologies, identity management, censorship resistance, anonymity, traffic analysis and profiling.	They provide consultancy services on anonymity infrastructures.	Kasteelpark Arenberg 10, bus 2452, B-3001 Leuven-Heverlee, Belgium. +32 16 32 10 50 Pela.noe@esat.kuleuven.be www.esat.kuleuven.be/cosic
EPFL's Security and Privacy Engineering Laboratory	It focuses its research on building secure and privacy-preserving systems.	They test and evaluate anonymisation practices and build tools and models for risk assessment. Their services are provided together with Eticas (see below).	BC 258 (Batiment BC), Station 14, CH-1015 Lausanne, Switzerland. +41 21 69 37180 Carmela.troncoso@epfl.ch https://spring.epfl.ch/en/the-spring-lab
UCL's Information Security	Research group with a specific focus on anonymity. Part of	They provide advanced training in the area of anonymity.	Dept. of Computer Science, Malet Place Engineering Building, University College

Research Group	University College London's department of computer science.		London, Gower Street London, WC1E 6BT, UK. +44 20 7679 7214 http://sec.cs.ucl.ac.uk/home
Private companies			
Aircloak	Company based in Germany and the United States, specialised in providing anonymisation solutions in the banking, automobile and service sectors.	Their patented technology provides what they market as "the first GDPR-grade anonymisation solution capable of providing high-quality analytics while maintaining strong anonymisation".	Brunnenstrasse 185, 10119 Berlin, Germany. +49 631 9303 6248 solutions@aircloak.com https://aircloak.com
Eticas Research and Consulting	Consultancy based in Barcelona focusing on the legal, social and ethical impact of data-intensive technologies.	They offer a re-identification risk assessment service (together with EPFL lab), governance models for personal data sharing and GDPR compliance services.	Ferlandina 49, 08001 Barcelona, Spain. +34936005400 info@eticasconsulting.com www.eticasconsulting.com
Privitar	A software company headquartered in London, with a client-base across North America, Europe and Asia.	They sell three solutions: Privitar Publisher (anonymisation software), Privitar Lens (access platform for sensitive datasets) and Privitar SecureLink (a secure data linking system)	30 Stamford Street, London, SE1 9LQ, UK. +44 203 282 7136 info@privitar.com www.privitar.com
Privacy Analytics	Software company specialising in data privacy.	They offer anonymisation software, certification, training and consultancy.	251 Laurier Avenue W, Suite 200, Ottawa, Ontario, Canada, K1P 5J6.
